ONE
POWERFUL
SHOW.

October 31-November 3, 2010
McCormick Place
Chicago, Illinois USA

Mark your maps and agendas! Starview is conveniently located in **Booth N3915** North Hall in the center near the front.

We will be showing a number of new machines and package configurations. Being shown for the first time is the PHS1-26 Impulse Jaw Clamshell sealer. The new MSTS-1014 Film to Food Tray sealing machine will also be featured. This machine replaces the former TS-75. Additional details are given later in the newsletter.

We will have a PHS8A-1418 Fully Automatic Blister and Clamshell Packaging Machine producing MWV Natralock® tear resistant double card trapped blisters packages from Rohrer Corporation with cold foil graphics.

The newest version of the MSP-1218 table top skin packaging machine, the updated MR2-1418 and a MR/PH2-1824 large format medical device packaging machine are available for demonstration.

We look forward to demonstrating the machines we manufacture for you and discussing any upcoming projects.

New Shuttle Type Film to Food Tray Sealing Machines introduced for PackExpo.

Starview will be showing its new Food Tray Sealing Machines at PackExpo. There are four models available. Two are manual models with the sealing head operated by a lever the MSTS-78 and MSTS-1014. A table top machine with a pneumatically operated sealing head model PSTS-1014 will operate where compressed air is provided. The floor model PSTS/MAP-1013 will evacuate the sealing chamber and provide modified atmosphere protection to extend the shelf life of certain foods.

All of the models are available with lower cost tooling for a straight film cut-off and tooling sets for making a profile trim of the film after sealing.

A new brochure with embedded video will be posted on the website shortly in the Food Packaging Machine section of our website. Quotation/specification sheets are available now for each of the four new models.

Please contact us to find out more about how Starview's new Food Tray Sealing Machines can benefit your clients.

New CD ROM Sets to release for Quarter IV.

We are putting the finishing touches on V 5.0 of the CD-ROM sets. All of the pricing on V 4.0 dated January 2009 has now expired. You should request quotations for all of our machines or tooling.

The new CD sets should be in your hands by the end of the year. If you would prefer to pick up your CD-ROM set at PackExpo please send an email to steve@starview.net indicating so.

Let Starview assist your customers with machines designed to make the total manufacturing process more effective. Contact one of our sales staff for packaging solutions to help your customers reduce cost and stay competitive.
