

Breaking news!!! Starview has moved to a new location

Over the past weekend Starview completed its move to a new facility.

We apologize to those of you who have been inconvenienced by this event. We did not anticipate a move this year; however, a facility became available that was the perfect size and location for Starview's continued growth. The entire process from the negotiations through the real estate closing and refurbishing of the building to a completed move took less than 60 days.

Our new address is:

**Starview Packaging Machinery, Inc.
1840 St. Regis Blvd.
Dorval, Quebec, H9P 1H6
Canada**

[View Map](#)

Our phone numbers and other contact information will remain the same.

This move to new quarters increases our office and manufacturing space three-fold. We now have increased manufacturing floor space and finished goods storage space. We have been able to separate the different manufacturing functions to allow for greater efficiencies. We anticipate this will help us improve deliveries in the future. The increased storage space will allow for some additional finished machine storage as well.

We now have an inviting reception area and visitor conference room. In addition we have included a machine showroom where we have a selection of our standard machines on display and will be able to demonstrate most customer machines and perform final acceptance testing outside of our core manufacturing area.

Please take this opportunity to update our contact information in your database.

Starview continues to lead the industry with innovative packaging machine designs for :

- Blister & Clamshell Sealing
- Medical / Pharmaceutical Packaging
- Skin Packaging and Die Cutting
- Food Tray Packaging
- Thermoforming / Vacuum Forming
- Customized Packaging Equipment

Update on the Distributor Portal for Starview's website

We continue to work on the distributor only portal on our website. This turned out to be a greater task than anticipated. We are currently working on the Heat Sealing Machines for Retail Carded Packaging. Once this section that includes the SB, MR, RB, ERB , FAB, BSC and CBS series machines is complete we will launch it to several distributor Beta testers. As soon as we feel it is debugged sufficiently we will release it to everyone.

Please continue to contact us for the latest quotations on any of our machines. We look forward to working with you on any existing or new projects you may have. latest quotations on any of our machines.
