

## Rotary Sealer with modular automation from Starview gives Pharmaceutical client maximum flexibility.

Starview recently produced an automatic rotary sealing machine to produce pharma wallet packs that featured both automation and modular construction for maximum flexibility. The three feeders on the machine, two for the cards and one for filled tablet blisters, are self-standing and removable from the machine. A docking port allows the feeder to be aligned to the machine without additional adjustments. This modular approach allows automated production of high volume products with the feeders in place and manual production of lower volume products with the feeder modules removed.

The filled tablet blister feed station included a vision system linked to the finished package unloader. Accepted packages are unloaded to a conveyor while rejected packages drop through a chute to a reject bin.

This modular approach can be applied to most of our rotary and carousel style machines for retail carded packages as well as medical and pharmaceutical packages. Click the image at your right to view a short video of this versatile machine from Starview.

### Starview Packaging Machinery, Inc.

Leading the industry

With innovative packaging machine designs for:

Blister & Clamshell Sealing · Medical / Pharmaceutical Packaging · Stretch Pak Packaging  
Skin Packaging and Die Cutting · Food Tray Packaging · Thermoforming / Vacuum Forming  
Customized Packaging Equipment · Systems with Automation & Integration
