## DESCRIPTION:

**Starview's PHSA Series** rotary type Clamshell and Blister sealers are designed for high volume production requirements. These machines may be used for Plastic-to-Plastic Clamshell sealing as well as conventional carded blisters, full face blisters and half-clamshell styles including applications using Tyvek, foils and other heat sealable lidstock. The **PHSA Series** units are available in eight (8) station designs with standard sealing areas of 14 x 18 inches and 18 x 24 inches. Larger sealing areas are available on request. The standard machines feature one heated sealing station and one cooled station, one finished package unload station, one bottom blister feed station, one insert card feed station and one top blister feed station with the remaining stations used for operator product loading stations.

For machines capable of higher production rates or with additional open stations for value-added automation please consider Starview's **BSC II Carousel Series** machines.
