EXPERIENCE THE STARVIEW ADVANTAGE:

- A wide range of standard and custom features available to match customer requirements.
- Generous use of stainless steel and powder coated steel in the structure for the most durable finish in the industry.
- Color touch screen HMI for the ultimate in operator convenience and accessibility. Includes storage for 99 databases and on-screen data tracking.
- A Starview exclusive remote access via standard Ethernet hardwire or optional Wi-Fi router gives management access to real-time process information from the machine.
- On-screen temperature calibration standard with optional on-screen pressure calibration available to simplify validation using direct access validation ports.
- Precision indexing inline conveyor for precise sealing fixture to matching relieved face plate alignment.
- Ultra-high pressure sealing presses used in conjunction with matched aluminum tooling to give consistent sealing patterns with any heat sealable medical lidding materials. Hydro-pneumatic press available for cold seal materials.
- Industry leading design, construction, features and customer support.

DESCRIPTION:

Starview's CBS/PH Series inline conveyor type heat sealers are designed for high volume production requirements. These machines may be used for pharmaceutical wallet pack as well as medical device applications using medical papers, Tyvek, foils and other heat sealable lidstock. Given the proper conditions these machines are capable of up to 20 cycles per minute in production. The Automated Inline Conveyor blister sealing machines are built with the capability to feed blister(s), tray(s), card(s), Tyvek and discharge finished packages when proper tooling is installed. With seven (7) open loading stations these machines are ideal for automated product loading or where multiple items are to be placed in a single package.

Machines with other sealing areas and different numbers of stations are also available. Consider Starview's FAB/PH Series for automatic rotary machines.

SPECIFICATIONS:

CBS30-1428

Sealing area:	14" x 28"
Total no. of sealing textures:	30
Open loading stations:	7
Heating system:	2 Zones
Blister/tray feeder:	Standard
Card feeder:	Standard
Finished package unloader:	Gravity drop standard / Transfer mechanism optional
Maximum blister/tray depth:	3.5"
Average cycle speed:	1-20 cpm
Electrical:	208-230 Volts / 3 PH / 50 Amps
