MEDICAL / PHARMACEUTICAL

FROM MANUAL SHUTTLES, TO SEMI-AUTOMATIC ROTARIES TO FULLY AUTOMATIC ROTARIES, CAROUSELS & INLINE PACKAGING MACHINES

YOUR MARKET ... OUR SOLUTIONS

Starview's **Medical & Pharmaceutical Packaging** Machines are available with the largest selection of standard sizes, makes and models in the industry. From manual to semi-automatic to fully automatic machines that includes our shuttles, rotaries, carousels and in-line blister packaging lineup.

Starview continues to update, and innovate to bring flexible, easy to operate, high value to investment machine options to the blister packaging market for over 35 years. Automated / Integrated and Customized Medical and Pharmaceutical Packaging Systems can be viewed on those pages showcasing what Starview can do for your specific needs. Contact us to see how we can help you take advantage of our experience.

the **STARVIEW** **ADVANTAGE**

SB-PH1-1012

- A wide range of standard and custom automation features available to match customer requirements.
- Generous use of powder coated steel, stainless steel and polycarbonate in the structure for the most durable finish in the industry.
- Color touch screen HMI for the ultimate in operator convenience and accessibility. Includes storage for 99 databases and on-screen data tracking.
- A Starview exclusive remote access via standard Ethernet hardwire or optional Wi-Fi router gives management access to real-time process information from the machine.
- On-screen temperature calibration standard with optional on-screen pressure calibration available to simplify validation using direct access validation ports.
- Ultra-high pressure sealing presses used in conjunction with matched aluminum tooling to give consistent sealing patterns with any heat sealable medical lidding materials.
- Precision indexing rotary table for precise sealing fixture to matching relieved face plate alignment.
- Industry leading design, construction, features and customer support.

MANUAL SHUTTLE FOR SAMPLING & PROTOTYPE

MEDICAL & PHARMACEUTICA MACHINE

YOUR MARKET ... OUR SOLUTIONS

The **SB/PH1-1012 Series** single-station table top manual shuttle type heat sealers are designed for product development and package sampling. These machines are specifically designed for medical applications using foils, medical papers, Tyvek and other heat sealable lidstock.

For production machines please consider Starview's **SB/PH1-1418, 1824** or **1836** Series manual shuttle, **MS/PH1** Series auto-shuttle, **MR/PH2** Series manual rotary, **ERB/PH** Series semi automatic Rotary, **FAB/PH** automatic rotary or **CBS/PH** inline conveyor sealing machines.

the STARVIEW ADVANTAGE

- Color touch screen HMI for the ultimate in operator convenience and accessibility. Includes storage databases.
- A Starview exclusive remote access via an EWON remote system gives management access to real-time process information from the machine.
- On-screen temperature calibration standard with optional on-screen pressure calibration available to simplify validation using direct access validation ports.
- Economical table top machine for clean room or laminar flow hood operation to produce production equivalent prototype and sample packages.
- Generous use of stainless steel and polycarbonate in the structure for the most durable finish in the industry.
- Temperature and pressure validation using optional direct access ports for ease of connection.
- High pressure sealing press used in conjunction with matched aluminum tooling to give consistent sealing patterns with any heat sealable medical lidding materials.
- Industry leading design, construction, features and customer support.

SB/PH1SERIES

MANUAL SHUTTLE MEDICAL & PHARMACEUTICAL MACHINE

YOUR MARKET ... OUR SOLUTIONS

The **SB/PH1 Series** single-station floor model shuttle type heat sealers are designed for small to medium volume production requirements. These machines are specifically designed for medical applications using foils, medical paper, Tyvek and other heat sealable lidstock. These high- quality machines are ideal for start-up companies, back up equipment, cellular production lines or low volume in-house packaging. **SB/PH1 Series** machines are one (1) operator shuttle type sealers utilizing quick-change sealing fixtures.

For machines capable of higher production rates please consider Starview's **ERB/PH** Series semi automatic Rotary, **FAB/PH** automatic rotary or **CBS/PH** inline conveyor sealing machines.

the **STARVIEW** **ADVANTAGE**

- A wide range of standard and custom features available to match customer requirements.

CBS/PH SERIES

FULLY AUTOMATIC INLINE MEDICAL & PHARMACEUTICAL MACHINE

YOUR MARKET ... OUR SOLUTIONS

The **CBS/PH Series** inline conveyor type heat sealers are designed for high volume production requirements. These machines may be used for pharmaceutical wallet pack as well as medical device applications using medical papers, Tyvek, foils and other heat sealable lidstock. Given the proper conditions these machines are capable of up to 20 cycles per minute in production. The Automated Inline Conveyor blister sealing machines are built with the capability to feed blister(s), tray(s), card(s), Tyvek and discharge finished packages when proper tooling is installed. With seven (7) open loading stations these machines are ideal for automated product loading or where multiple items are to be placed in a single package.

Machines with other sealing areas and different numbers of stations are also available. Consider Starview's **FAB/PH Series** for automatic rotary machines.

the **STARVIEW** **ADVANTAGE**

- A wide range of standard and custom features available to match customer requirements.
- Generous use of stainless steel in the structure for the most durable finish in the industry.
- Color touch screen HMI for the ultimate in operator convenience and accessibility. Includes storage for 99 databases and on-screen data tracking.
