SP & SP/IR SERIES

SEMI-AUTOMATIC SKIN PACKAGING MACHINE

YOUR MARKET ... OUR SOLUTIONS

Starview's SP Series skin packaging machines are designed for low to medium volume applications. They incorporate a stationary heating system with instant on/off heaters, which come up to heat during cycles and turn off for loading/unloading.

The SP skin packaging machines have PLC timer control for precision repeatability and an accurate turbine regulator. A manual in-feed table, out-feed table and impulse type hot wire film cut-off are standard. These machines are a sturdy welded steel construction with removable panels for servicing.

The SP Series is available in the standard sizes beginning with 18 inches by 24 inches and also custom sizes. For machines with additional automation please consider our ASP Series.

the STARVIEW ADVANTAGE

- A wide range of standard and custom size machines available to match customer requirements.
- The only pendant mounted color touch screen HMI in the industry for the ultimate in operator convenience and accessibility.
- A Starview exclusive remote access via standard Ethernet hardwire or optional Wi-Fi router gives management access to process information from the machine.
- Fully adjustable vacuum motor speed and oven power using an on-screen touch bar graph to provide precise film temperature and vacuum control.
- Machine operating recipe storage including all timer and bar graph settings with memory for up to 99 different recipes for operator recall of proven set-ups for complex products.
- Industry leading design, construction, features and customer support.
